The Flutter Developer has 1 year of experience as a front-end Android Developer, specializing in the use of Flutter technology. During this time, I have successfully completed numerous projects using Flutter, including my own college project. Additionally, I have worked as a freelancer within a team of 5 members, where we collaborated to develop many Flutter Apps. Alongside my expertise in Flutter, I possess a solid understanding of other programming languages such as C and C++.

Key Skills

- Flutter
- Dart
- Firebase
- And basics knowledge of C, C++, C# and SQL.

Professional Experience

Flutter Developer

Job Circle | Dec 2022 - Present

BSc in Information Technology

Mumbai University at Mumbai | June 2017 - October 2020

Projects

Job Circle

Dec 2022 - Present

The "Job Circle" is a job portal that is a product of my current company. It is developed using Flutter for the frontend and AWS for the backend. Since joining the company, I have been working as a frontend developer on this project.

Fin Moto

Aug 2022 - Nov 2022

The "Fin Moto" is for selling or financing second-hand two-wheelers, developed using Flutter and utilizing Firebase as the backend. It consists of an admin app for order and product management, as well as a customer app. The customer app has two types of logins: one for normal users and another for dealers.

Fasheo App

April 2022 - June 2022

The Fasheo is developed mainly for Online Cosmetics and women's wear product delivery. The frontend of the project is in the language Dart in combination with the framework Flutter. The backend of the system uses Firebase, Firebase Authentication for Login and Sign up, and Cloud Firestore as database.

News App

September 2021 - October 2021

The News App is developed mainly for Online news reading and it was my intern project in this app. The good categories news is available for the user. The frontend of the project is in the language Dart in combination with the framework Flutter. API integration uses for backend and for Login, Signup

Restaurant App

November 2019 - March 2020

The Restaurant App is developed mainly for Online Food orders and Seat reservations. The frontend of the project is in the language Dart in combination with the framework Flutter. The backend of the system uses Firebase, Firebase Authentication for Login and Sign up, and Cloud Firestore as database.
